TECHNOLOGY BEHIND CHIRAG'S THERAPY

Science-Based Technology. Real-World Results.

Harnessing advanced Class IV laser technology, this system integrates a unique dual-wavelength output, intelligent software, and an ergonomic design—delivering deep tissue penetration, rapid pain relief, and accelerated healing for animals of all sizes.

Wavelength Synergy:

810nm:

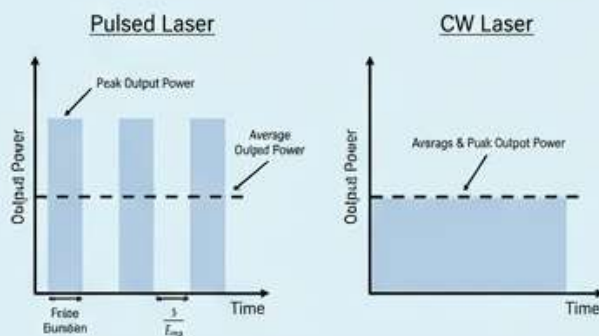

Deep tissue biostimulation

980nm:

Enhanced analgesia & vasodilation

Optical Penetration:

Reaches muscles, tendons, ligaments, and joints efficiently

Pulse Mode & CW Mode:

Adjustable emission modes for targeted therapy

Built-in Treatment Protocols:

- Dogs, Cats, Horses, and Exotic Pets

Therapeutic Mechanism

How Laser Therapy Heals the Animal Body

Photobiomodulation (PBM) is a non-invasive therapy that uses specific wavelength of light to stimulate cellular repair, reduce inflammation, and promote healing. This advanced treatment enhances mitochondrial activity, increases blood circulation, and accelerates tissue regeneration—providing pain relief and faster recovery for animals suffering from injuries, arthritis, or post-surgical wounds.

Mechanisms:

- Increases mitochondrial ATP production
- Enhances blood circulation and oxygenation
- Reduces inflammation and edema
- Relieves acute and chronic pain
- Promotes tissue regeneration and nerve repair

Veterinary Applications

Wide Clinical Use Across Species and Conditions

SMART CLASS 4 LASER is designed for everyday use in general practice, sports medicine, and post-operative care.

Indications:

Dogs & Cats:

Arthritis
Hip dysplasia
Dermatitis
Disc disease
Surgical recovery

Horses:

Tendonitis
Laminitis
Sore backs
Hock pain
Performance recovery

Other Species (Rabbits, Birds, Turtles):

Wound healing
Inflammation
Skin conditions

SMART CLASS 4 LASER: Transformative Benefits for Veterinarians

- High power: faster treatment times and better outcomes
- Treats a wide range of conditions and animal species
- Built-in protocols: quick start and ease of use
- Non-invasive & drug-free pain solution
- Boosts patient satisfaction and client loyalty
- Built with premium components for lasting durability and reliability.

Introduction to SMART CLASS 4 LASER Revolutionizing Animal Healing Through Light

- Up to 10W high-power output
- 1064nm wavelength synergy
- Preset veterinary protocols
- Touchscreen control & user-friendly design
